Hunan WISE New Material Technology Co., Ltd. Release

QWISE-FM-SBJSGC-2019-JBQM

Company Standard

Hunan WISE New Material Technology Co., Ltd.

Powder sub-factory

production process equipment safety technical regulations

Safety technical specification for agitating ball mill

- 1、Wear overalls,work shoes,gloves,and dust masks before operation.
- 2、Check whether the parts of the equipment are good before use, whether the height of the stirring rod is appropriate, and whether the idling operation is normal.
- 3、The cover should be covered during the operation of the equipment to prevent debris from falling into the barrel,and the hand cannot be inserted into the barrel.If adding materials,stop the operation.
- 4、The speed of the stirring rod should be adjusted during the operation of the motor to 25 rpm.
- 5、The motor should be refueled once every six months of operation.
- 6、The equipment should be inspected frequently,and abnormal conditions should be stopped immediately.
- 7、Disconnect the power of the motor first,then clean the cover,turn the lifting handle,slowly raise the stirring rod,and then remove the ball barrel to discharge.
- 8、Keep equipment and the environment clean and tidy.
