Powder sub-factory

production process equipment safety technical regulations

Safety specification for open tilting press

Operators must wear overalls and gauze masks and gauze gloves before work.

Items that hinder the operation of the equipment must be removed before work and the equipment should be thoroughly inspected.

The operation must be tested first. After the operation is normal, adjust the distance of the punch to press the electrode.

- 4、 During the operation of the press,it is strictly forbidden to reach into the stamping area.
- 5、 The punching machine can be operated separately or double.When double operation,one person is facing the punching machine,and the other person is sitting on the right side,and the attention should be concentrated.
- 6、 Failure during the operation of the press must be stopped.
- 7、 Do not remove the equipment protection device.
- 8、 After work,cut off the power and clean.
