production process equipment safety technical regulations

Safety technical regulations for iron suction machine

- 1、Wear the overalls and wear a dust mask when operator operating.
- 2、Before starting the machine, check the equipment to make sure there are no abnormalities before using it.
- 3、Start the blower first, clean the equipment, and then carry out the iron suction operation.
- 4、After the material in the bowl is filled with iron, it is safely suspended by a crane on the iron frame.
- 5、After the equipment is running normally, the iron can be removed. The cutting should be slow and even.
- 6、When stopping, stop cutting and then cut off the power.
- 7、It is forbidden to touch the transmission device by hand during the operation of the iron.
- 8、When the equipment is running, it is necessary to check whether there are any abnormalities and find out the problems in time.
